

## Working Student COMPONENT TESTING II (f/m/d)

### **Inspiration for future | envie d'avenir | Desarrollo tecnológico?**

Are you interested in exciting developments in future-oriented technologies?  
Are you motivated and want to implement your creative ideas?  
Then here is your chance:

We are looking for you as a working student (f/m/d) in component testing.

#### **Your tasks**

- Updating of telematics components' software
- Coding of diagnostic switches
- Carrying out smoke tests
- Execution of user stories: e-calls, service calls, remote status
- Reporting

#### **Your profile**

- Enrolled in communications- or electrical engineering/ informatics
- strong IT affinity
- Problems are challenges that you are able to analyze
- Good German (basic) and English communication skills
- open-minded, curious and committed character

#### **We offer**

- Flexible working hours with great international colleagues and open communication
- Direct support with increasing transfer of responsibility in real development projects
- Attractive remuneration and offers for study projects

With us you can expect the charm of an uncomplicated, medium-sized engineering company with interesting orders from the major automotive industry. Our flat hierarchy enables a friendly, appreciatively and lively working atmosphere.
